But the Chironian universe was no longer a closed system. Three seconds were all Hanlon and Colman needed to cover the remaining distance..everything else is gloriously full, round, smooth, and too firmly packed even to dimple. She glanced at her grandchildren. "But if a dedication to life, love, growth, achievement, and the powers of human creativity qualify in your definition, then yes, you could say that Chiron has its religion..A call came through from Brigade, and Sirocco switched into the audio channel to take it. Colman sat back and looked around. The indicators and alarms on the console in front of him had nothing to report. Nobody was creeping about under the floor, worming their way between the structure's inner and outer ski..-, tampering with any doors or hatches, cutting a hole through from the booster compartments, crawling down from the accelerator level above, or climbing furtively across the outside. Nobody, it seemed, wanted any thermonuclear warheads today. He rose and moved round behind the chair. "Need to stretch my legs," he said as Sirocco glanced up behind his faceplate. ',It's time to do a round anyhow." Sirocco nodded and carried on talking inside his helmet. Colman shouldered his M32 and left the guardroom..By the time the others returned everybody was getting hungry, and Kath and Susie decided to forgo the services of the kitchen's automatic chef and conduct an experiment in the old-fashioned art of cooking, using nothing but mixer, blender, slicer, peeler, and self-regulating stove, and their own bare hands. The result was declared a success by unanimous proclamation, and over the meal the Terrans talked mainly about the more memorable events during the voyage while Kath was curious to learn more about the Mayflower II's propulsion system in anticipation of the tour that she was scheduled to make with the Chironian delegation. Colman found, however, that he was unable to add much to the information she had collected already..Someone gave it to Aunt Geneva for nothing..After a hesitation, Leilani said, "Dr. Doom says he's had this vision that we'll both be healed by.since..and cat-free sanctuary of the care

"Missiles wouldn't be any use to them, and they know it. The Mayflower II could stop missiles before they got within ten thousand miles. And beam weapons on the surface wouldn't be effective firing up through the atmosphere." He spread his hands imploringly. "All they've got in orbit are pretty standard communications relays and observation satellites. The moons are both out of range of beam projectors. So what else is there?." "We couldn't let him do that, could we?" Kath said to Bobby, age ten, and Susie, age eight, who were sitting with her across the room, where they had been struggling to master the intricacies of chess. "Lurch is half the fun of coming here." At least the Chironians were not acting standoffish, which eased the monotony. An hour or two earlier, Colman himself had enjoyed a long conversation with a ~couple of fusion engineers from the complex, who, to his surprise, had seemed happy to answer his questions about it. They had even offered him a quick tour. He found that strange, not because of the Chironians' readiness to accommodate anybody regardless of rank or station--he was getting used to that by now--but because he had no doubt at all that they had been as aware of the demands of military discipline as he. Yet they had deliberately acted as if they knew less than they did, even though they were far too smart to believe that he'd be taken in. The Chironians did it all the time. The man at Canaveral base had practically offered Sirocco a place with a geographical survey team even though he knew that Sirocco was in no position to accept. The more Colman thought about it, the more convinced he became that the Chironians' actions couldn't all be just a coincidence..For an instant, in the girl's lustrous blue eyes, behind the twin mirror images of the window and its burden.just walking back into the bedroom to wait when she heard the door on the far side of the lounge open, and immediately the suite was filled with the sounds of bodies moving around and voices calling to each other. A few seconds later Colman appeared in the doorway from the lounge. Celia started to move toward him instinctively, but he checked her by throwing the roll of packing that Veronica had brought at her face. "You're in the Army," he said gruffly as she caught it. "Move your ass." "Which you're wearing," Noah guessed, pointing at the guy's.lady's plumb-bob spine even one millimeter out of true. "Well-meaning but useless," Leilani interrupted. She seemed to be speaking from experience. "Anyway,.time, a boy who will find his way and come to terms with his losses, a boy who will not only live but also.Despite having worked under him for several years, Fallows had never been able to master the art of feeling at ease in Merrick's presence. Displays of undue familiarity were hardly to be expected between echelon-six and echelon-four personnel, naturally, but even allowing for that, Fallows always found himself in acute discomfort within seconds of entering a room with Merrick in it, especially when nobody else was present. This time he wouldn't let it happen, he had resolved for the umpteenth time back in the corridor. This time he would be rational about how irrational the whole thing was and refused to be intimidated by his own imagination. Merrick had not singled him out as any special object of his disdain. He behaved that way with everybody. It didn't mean anything..Behind the truck, the highway remains deserted. "Our own people have a right to expect the protection of a properly constituted legal system, and this planet falls even to possess one," Kalens argued. "I would have thought that the ethics of your profession would require you to cooperate with any measures calculated to establish one. The purpose of this provision is precisely that." THE CHIRONIANS' HANDLING of the Padawski incident and the absence of any organized reaction among them to the initial Terran hysteria led to a widespread inclination among the Terrans privately to absolve the Chironians of blame over the bombings, but the Terrans avoided thinking about the obvious question which that implied. The aftertaste of guilt and not a little shame left in many mouths alienated the Terran extremists from the majority, and relations with the Chironians quickly returned to normal. Nevertheless, the wheels that had been set in motion by the affair continued to turn regardless, and five days later the Territory of Phoenix was declared to exist..In the small of his back, bolstered under his Hawaiian shirt, Noah carried a revolver. "Hey, you haven't asked me," Chang said. "I beat that." Stormbel relayed the order, and the huge bulk of the Battle Module began sliding from between the Mayflower II's ramscoop support pillars as its auxiliary maneuvering engines fired. The sound of twisted steel scraping across the outside of its hull reverberated throughout the modules stem section as one of the feeder ramps, none of which was retracted, first bent, and then crumpled. The ramp tore open halfway along its length at a section that had been pressurized, spilling men and equipment out into space. Veronica carried a large roll of packing foam on her shoulder, keeping it pressed against the side of her face. Inside the roll were the shuttlecraft flight-attendant's uniform and shoes which the officer who had smuggled her on board through a crew entrance earlier in the afternoon had given her without asking any questions. They mingled with the bustle

going on around the house and all through the ground floor, and eventually came together again upstairs, outside the door leading through to the rooms that had formed the Kalenses' private suite. Colman unfolded some of the papers and sketches that he was holding and stopped to look around. After a few seconds he gestured to attract the attention of the SD guard who was standing disinterestedly near the top of the main stairs, and nodded his head in the direction of the door. "Is that the way into the bedroom and private quarters?" he asked..this bed..an achievable goal to give up booze without a Twelve Step program.."Who said anything about them? Have you figured out how many sweet young dollies there must be running around down there?" Sirocco chuckled lasciviously over the intercom. "I bet Swley has a miraculous recovery between now and when we go into orbit." Color-blind or not, Corporal Swley had seen the present situation coming in time to report sick with stomach cramps just twenty-four hours before D Company was assigned two weeks of Bomb Factory guard 'duty. He was "sick" because he had reported them during his own time; reporting stomach cramps during the Army's time was diagnosed as malingering.."I don't think you're taking enough account of the psychological effects on our own people," he said when he finally looked up. "Morale is high now that we're nearly there, and I don't want to spoil it. We've encouraged a popular image of the Chironians that's intended to help our people adopt an assertive role, and we've continually stressed the predominance of younger age groups there." He shook his head. "Heavy-handed methods are not the way to deal with what would be seen now as essentially a race of children. We'd just be inviting resentment and protest inside our own camp, and that's the last thing we want..Those sagacities and uncouth others are from Mother's Big Book of Street-Smart Advice for the
